WORK EXPERIENCE

Mar 2026 – Atual

Mid-Level Fullstack Developer, itexto Consultoria

Experience in developing and maintaining high-demand corporate systems using Java, Go, Angular, relational databases, AWS, Amazon SQS, and Grafana. Responsible for implementing APIs, business rules, and service integrations, focusing on scalability, code clarity, and reliability. Also involved in performance analysis, query optimization, incident investigation in production, and converting client requirements into clear, prioritized, and delegable technical tasks for the team. Participated in the optimization of a critical query that reduced infrastructure costs by approximately US$700 per month for a client.

Abr 2024 – Mar 2026

Backend Developer, Busca Passagens

Experience in developing an airline ticketing portal, focusing on microservices, APIs, and internal automation. Development of scalable solutions using Java, Spring Boot, Go, and Python, utilizing RabbitMQ, Kafka, AWS, Jenkins, and Grafana to improve performance, sales, and operational stability.

Abr 2024 – Mar 2026

Backend Development Internship, Bluetape

Development of Python bots with Selenium for process automation, consumption of external APIs, and improvements in data processing routines using Pandas. Support in AWS environments, especially EC2 and S3, with version control using GitLab and GitHub.

SKILLS

Java
Golang
Microserviços
Angular
PostgreSQL
Docker
AWS Cloud
Amazon SQS
RabbitMQ/Kafka
Grafana
GitLab/GitHub
